About ERA International

ERA International is a company driven by a vision aligned with the National Vision of 2030. We go beyond mere transactions, instead building mutually beneficial relationships with our clients. Through our quality delivery, we enable and nurture the ambitions of our clients and staff.

Our goal at ERA International is to have a professional division dedicated to serving the industrial sectors with their needs for industrial material supply, workforce support, comprehensive technical specialized services, and project management personnel for the oil and gas, petrochemical, mining, infrastructure, production, and allied industries.

The organization has emerged to provide premium services for the industry, ensuring that we meet international standards of quality and safety. We face the future and its changes with the understanding that a satisfied customer is our greatest motivator and asset.

Our Vision

To become a most preferred service provider for the industry through our Integrity, Work Ethics, Technical Expertise, Safe Working Practices & Consistent Performance.

Our Business

- ⦿ Industrial Materials
- ⦿ Signages & Road Signs
- ⦿ ERA Tex
- ⦿ CNC Machines
- ⦿ Safety Supplies

Our Products

- ⦿ Ferrous & Non-Ferrous Product
- ⦿ Gratings
- ⦿ Handrails
- ⦿ Fabrications
- ⦿ Filter Agitator & Thickener

Our Business

Industrial Materials

Valves

We provide high-quality valves that are suitable for various industrial applications. A dependable solution for controlling the flow of liquids, gases, and vapours. We offer a wide range of valves, including ball, gate, globe, check valves, etc. Valves are available in various materials.

Gate Valve

High-quality valves to completely stop or fully open the fluid flow in a pipeline. Perfect for both above-ground and underground installations.

Globe Valve

Robust and high-quality valve that regulates flow and pressure by adjusting a plug or disc.

Butterfly Valve

A quarter-turn rotary device that shut-off flow in a piping system by rotating a disc.

Check Valve

Also known as foot valve, this well-designed check valve allows fluid to flow in one direction, preventing backflow.

Plug Valve

With the capacity to handle high pressure conditions, plug valves are one of the best options for commercial and light industrial applications.

Solenoid Valve

A type of electrically operated valve that regulates fluid flow by regulating electric current.

Pipes

Pipes are crucial for transporting fluids, gases, and vapors in various industrial applications. Our pipes are made from high-quality materials, including stainless steel, carbon steel, PVC, and CPVC, ensuring durability, corrosion resistance, and safety. We offer a wide range of pipes in various sizes, shapes, and specifications to meet specific industrial requirements.

Carbon Steel Pipes

Our carbon steel pipes are strong, affordable, and durable. With resistance to high temperatures, these are used in many different industries.

Stainless Steel Pipes

With durability and corrosion resistance, stainless steel are an excellent option for transporting gases, fluids, and other materials.

DSS Pipes

High-performance, corrosion-resistant DSS pipes offer strength and resistance to corrosion in extreme environments.

Copper Pipes

These highly conductive and corrosion-resistant pipes are used in plumbing, HVAC, and industrial applications.

ABS Pipes

ABS pipes are rigid, impact-resistant, and cost-effective. Perfect for various applications, including drainage, sewage, and industrial processes.

Vitrified Clay Pipes

Ensuring a long lifespan of up to 100 years, vitrified clay pipes are environmentally friendly and can withstand chemicals and extreme temperatures.

Industrial Materials

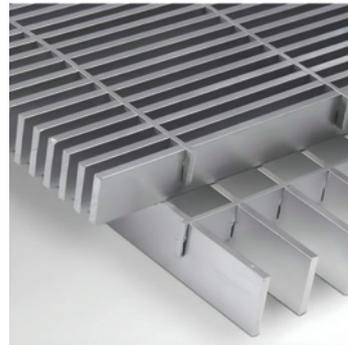

Gratings

Gratings are made from high-quality materials, including steel, aluminium, and fibreglass, etc. Our gratings ensure durability, strength, and corrosion resistance. We offer a wide range of gratings, including standard gratings, custom gratings, and speciality gratings.

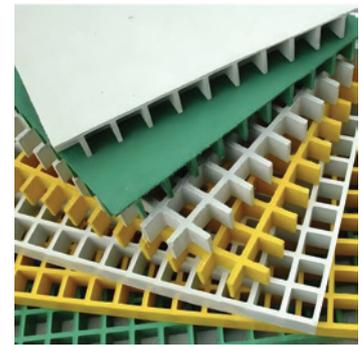

Echelle Gratings

With a stepped surface with a series of parallel grooves, echelle gratings are best for spectroscopy, LIBS, etc.

Aluminium Gratings

Made from durable aluminium materials, our aluminium gratings are best for flooring, walkways, etc. They are durable and offer excellent strength-to-weight ratio.

FRP Gratings

Lightweight, corrosion-resistant FRP gratings that are of high quality. These are widely used in many different applications.

Hose Fittings

One of the crucial components in different applications, including chemical processing, fluid power, and oil and gas. Our hose & fittings range includes hydraulic hoses, industrial hoses, fittings, and couplings.

PVC Hoses

Designed to prevent accidents in areas where explosives or flammable substances are present. Ideal for oil refineries, chemical plants, etc..

Hydraulic Hoses

Hydraulic hoses are available in a wide range of sizes, materials, and configurations. These hoses are durable, flexible, and resistant to corrosion. Our hoses can be customized according to customer preference.

Stainless Steel Hoses

Ideal for applications involving aggressive chemicals, high-pressure systems, and food processing. When it comes to stainless steel hoses, a wide range of sizes, configurations, and end-fittings are available.

Pumps & Accessories

Our pumps and accessories are designed to provide reliable performance, efficiency, and safety. We offer a wide range of pumps, including centrifugal pumps, positive displacement pumps, and submersible pumps, along with accessories such as seals, gaskets, and valves.

Centrifugal Pumps

High-quality pump that uses a rotating impeller to increase the pressure and flow rate of fluid. Features of centrifugal pumps include high flow rates, low maintenance requirements, and compact design.

Fire Hydrant System

A network of pipes, valves, and hydrants that provide a reliable source of water for firefighting purposes.

Submersible Pumps

Submersible pumps are designed to operate while submerged in a fluid, typically water or wastewater.

Electric Motors

High-quality electric motors can be used in various industrial applications, including manufacturing, oil and gas, and power generation. Our electric motors are designed to provide reliable performance, efficiency, and safety. We offer a wide range of electric motors, including AC motors, DC motors, and servo motors, in various sizes and specifications.

DC Motor

Our DC motors come with high torque, good speed control, and a simple design.

AC Motor

A good range of AC motors are available, including induction and synchronous motors.

Synchronous Motor

A type of AC motor with high efficiency, low vibration, constant speed operation, etc.

Industrial Fasteners

Our industrial fasteners include bolts, nuts, screws, washers, and studs, made from high-quality materials, including stainless steel, carbon steel, and brass, ensuring durability, strength, and corrosion resistance. These are essential components in various industrial applications.

Screws

We provide screws in a variety of types for specific applications and materials. Made with high-quality materials, our range of screws has high holding power.

Bolts

Bolts are available in various materials, including steel, stainless steel, and titanium. Commonly used in construction, automotive, and industrial applications.

Nuts

We provide high-quality nuts in different shapes, sizes, and materials, including steel, stainless steel, and brass.

Agitators

Agitators are vital components in various industrial applications, including chemical processing, pharmaceuticals, and food processing. Our agitators are designed to provide reliable performance, efficiency, and safety. We offer a wide range of agitators, including top-entry agitators, side-entry agitators, and bottom-entry agitators, in various sizes and specifications.

Paddle Agitators

A type of mixing equipment that is used to blend liquids, solids, as well as gases in different industrial processes.

Anchor Agitators

Best for mixing and blending liquids, pastes, and slurries in industrial settings.

Propeller Agitators

An excellent option for mixing low-to-medium viscosity liquids like oil, water, syrups, etc.

FRP/GRP & GFRC Items

FRP/GRP and GFRC items are made from high-quality materials, ensuring durability, strength, and corrosion resistance. We offer a wide range of FRP/GRP and GFRC items, including pipes, tanks, and fittings.

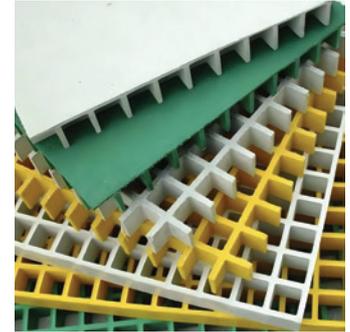

FRP/GRP Mortar Pipe

Excellent composite pipes that offer strength, corrosion resistance and durability. Suitable for sewage, water supply, as well as industrial piping systems.

FRP/GRP FGD Pipe

Specially designed for Flue Gas Desulfurization systems, these pipes are easy to install and have a long service life. FRP/GRP FGD Pipe can also withstand acidic and humid environments.

FRP Gratings

Resistant to corrosion from chemicals, seawater, and harsh chemicals, FRP gratings are a perfect choice for electrical insulation.

Pallets

Our pallets are made from high-quality materials, including wood, plastic, and metal, ensuring durability, strength, and safety. We offer a wide range of pallets, including standard pallets, custom pallets, and speciality pallets. Ideal in various industries including logistics, warehousing, and transportation.

Wooden Pallet

Cost-effective and long-lasting wooden pallets to support and transport goods. Can be reused and recycled.

Plastic Pallet

Best plastic pallets to provide a durable and long-lasting platform for transporting and storing goods.

Metal Pallet

With the ability to withstand heavy loads, top-notch metal pallets are available in different styles and configurations.

Industrial Materials

Welding Consumables

Welding consumables are essential for various welding processes, including shielded metal arc welding, gas metal arc welding, and gas tungsten arc welding. Our welding consumables include electrodes, wires, and fluxes, made from high-quality materials, ensuring reliable performance, durability, and safety.

Consumable Welding

Can be used to weld a wide range of metals, including steel, aluminium, and stainless steel.

Non-Consumable Welding

Non-consumable welding include high-quality welds, low distortion, and good control over the welding process.

Orbital Welding

Orbital welding can be used to weld a wide range of materials, including stainless steel, carbon steel, and titanium.

Instrumentation & Analytical Materials

Our instrumentation & analytical materials range includes temperature sensors, pressure sensors, flow meters, etc. These are crucial for many industries including process control, quality control, and research and development. We don't compromise on quality and offer high-quality products that last long if used accordingly.

Environmental Measurement

An efficient solution to monitor and assess different environmental parameters to understand the impact of activities on the environment.

Telecommunication Equipment

To efficiently provide secure and high-speed communication services. Ideal for residential internet access to large-scale enterprise networks.

Electrical Measurements

An essential solution to ensure the safe and efficient operation of electrical systems. Makes it easier to prevent electrical accidents and comply with safety standards.

Electrical Consumables

Made from the best quality materials, our electrical consumables range includes low-voltage cables, high-voltage cables, coaxial cables, and fiber optic cables. This includes cables, wires, connectors, and switches. Our electrical consumables are an ideal choice for different electrical engineering, construction, and manufacturing.

Batteries

Top-notch batteries for different devices. Available in various types and sizes.

Fuses

Essential safety devices that protect electrical circuits from overcurrent short circuits. Exceptional fuses that doesn't compromise on the quality.

Light Bulbs

Comes in various shapes, sizes, and colour temperatures. Available in different types, including LED, fluorescent, etc. The efficiency, price, lifespan, and durability depend upon the bulb type.

Electrical Wires and Cables

A wide range of top-quality insulated and non-insulated wires and cables. It can be used for different electrical applications, including residential, commercial, and industrial installations.

Circuit Breakers

Available in various types, including MCBS, MCCBs, and ACBs. Best solution to protect circuits from damage caused by short circuits, overcurrent, etc.

Switches and Outlets

With the ability to withstand heavy loads, top-notch metal pallets are available in different styles and configurations.

IT Solutions

Our IT solutions are designed to provide reliable performance, efficiency, and safety. We offer a wide range of IT solutions, including hardware, software, and consulting services. These solutions are necessary for different industrial applications such as data management, network security, etc.

Conference & Meeting Room Installation

Top-notch conference and meeting room installation services are available.

CCTV & Surveillance Camera Installation

Professional CCTV and surveillance camera installation services are available.

Thermal Cameras Installation

Provide professional thermal camera installation services. Our team installs and configures thermal cameras responsibly.

Security Equipment

As a vital component in protecting people, assets, and infrastructure from various threats, security is a top priority. We offer a range of security equipment that you can trust and rely on. Our portfolio of security equipment includes CCTV cameras, access control systems, alarm systems, and surveillance equipment. These products are designed to provide reliable and efficient performance.

Barrier Arms

Also known as boom barriers, these are well-designed and developed to manage vehicle access in various settings. Perfect for parking facilities, gated communities, etc.

Access Control Systems

Exceptional access control systems to regulate entry and exit points efficiently. Ideal for commercial, residential, & industrial settings.

Road Blockers

High-quality road blockers used to block vehicle entry in different settings such as government facilities, high-security properties, etc.

Signages & Road Signs

We provide a range of signage and road sign solutions for navigating, informing, and more. Our products include Wayfinding Signage, Pylons Signage, GFRc Totem Signage, Decorative Signs, and more. High-quality signage solutions are available for public spaces, roads, and other areas.

Road Safety Signs

Made from durable materials, road safety signs feature clear typography to prioritize driver and pedestrian safety. We offer a wide range of road safety sign solutions, including warning signs, guide signs, information signs, and construction signs.

Gas Station Projects

We design, manufacture, and install customized gas station signage. Utilizing high-quality materials, such as durable metals, weather-resistant coatings, and energy-efficient lighting, we ensure minimal maintenance for these solutions.

POP Materials

Our POP materials are designed to get attention, communicate key messages, and drive sales. We utilize advanced printing technologies to produce quality colours, crisp text, and detailed graphics.

Road Signs

Standard and custom road signs for highways, urban areas, and parking lots. We offer a range of warning, guide, and informational road signs. Ideal to provide clear information and ensure safety.

ACP Cladding

Made from aluminium composite material (ACM), this product is available in different colours and finishes. Its lightweight design and easy installation make it an ideal choice for building facades, partitions and signage.

Decorative Signs

A unique option to add visual appeal to any space. Our decorative signs are made from high-quality materials to project attractive designs, vibrant colours, etc. As one of the best options for branding, our decorative signs are perfect various settings.

Era Tex

We offer a wide range of workwear apparel designed to provide comfort and safety for workers in various industries. Our products include men's and women's clothing, outerwear, knits, and accessories.

CSA Boots

High-quality CSA-approved boots that are essential for compliance and safety. These boots are engineered to meet rigorous safety standards, featuring slip-resistant soles, steel toes, and puncture-resistant midsoles.

Fire Retardant

Made from innovative materials that self-extinguish upon contact with flames, this apparel offers an essential layer of protection. It is ideal for industries such as oil and gas, electrical, and chemical processing. range of cameras to meet the specific requirements of customers.

Industrial Bib Overalls

Made from durable, easy-to-clean fabrics, these overalls are designed for versatility in industries such as construction, manufacturing, and agriculture. Key features include multiple tool pockets, adjustable straps, and reinforced stress points.

Base Layers

Moisture-wicking base layers are designed to keep workers comfortable and dry during their shifts. The base layer helps regulate body temperature, making them suitable for active professionals in construction, manufacturing, and healthcare.

Industrial Jackets & Parkas

High-quality industrial jackets and parkas for outdoor workers. Made to be windproof, waterproof, and breathable, these jackets have adjustable cuffs, hems, and hoods, as well as multiple storage pockets.

Workwear Pants

Our workwear pants are made from high-quality, durable fabrics, and are well-designed to withstand the demands of physically demanding jobs. Our range of workwear apparel also includes jackets, shirts, hoodies, knits, aprons, etc.

CNC Machines

Our CNC machines are designed to provide manufacturers with a competitive edge in the market. With advanced CNC technology, our machines offer precision, speed, and flexibility. Our CNC machines cater to diverse industries, including aerospace, automotive, and medical devices.

Fabrication Machines

Our range of fabrication machines includes CNC punching machines, CNC laser cutting machines, CNC plasma cutting machines, and CNC bending machines. Our fabrication machines are the perfect addition to any CNC machining setup.

Robotics & Automation

Our robotics & automation solutions automate tasks such as part loading, unloading, and inspection. With the latest technology, these solutions help machining operators focus on high-value tasks, increasing overall productivity. Our automation systems also improve product quality and reduce production costs.

Tooling & Accessories

We provide a wide range of tooling & accessories to maximize machining operations. Our comprehensive range includes custom tooling, cutting tools, and accessories designed for productivity, and efficiency. These not only help achieve improved part quality, but also increase machining efficiency.

CNC Machines

Our CNC machines are designed to provide manufacturers with a competitive edge in the market. With advanced CNC technology, our machines offer precision, speed and flexibility. Our CNC machines cater to diverse industries, including aerospace, automotive, and medical.

Process Supporting Machines

Our process supporting machines are designed to improve CNC machining operations by providing essential support functions. This includes deburring machines, washing machines, and marking machines, according to different industry requirements.

Turnkey solution fixtures and tooling

Turnkey solution fixtures and tooling integrate precision fixtures, tooling, and automation to smooth manufacturing processes. Include custom fixtures, tooling solutions, automation integration, etc.

Safety Supplies

We provide a range of safety supplies that are essential for workers to be protected from many risks at the workplace. From personal protective equipment to safety gear and tools, we provide everything needed to maintain a safe working environment.

PPE

Our PPE range includes a wide variety of products, such as safety helmets, gloves, eye protection, respiratory masks, etc.

Lifting Equipment

From vacuum lifters to tractor wire rope hoists, all types of lifting equipment are available.

Flammable & Hazardous Material Storage

Designed to store and handle materials safely, our range of flammable & hazardous material storage solutions are of good quality.

Industrial Tools & Packaging Consumables

We provide a range of industrial tools & packaging consumables that play an inevitable role in many industries.

Lockout Tagout (LOTO)

Our LOTO include solutions designed to ensure a safe working environment and prevent accidents.

Oil and Chemical Spill Kits

Different types of oil and chemical spill kits, specifically for responding to spills and preventing environmental damage.

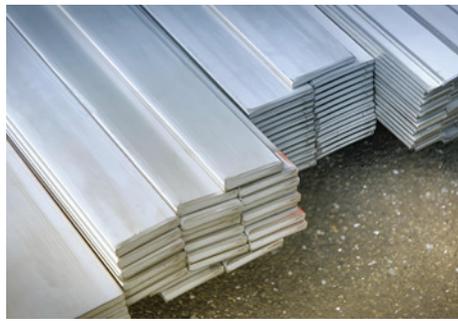

Ferrous & Non-Ferrous

Our Products

Mild Steel & Reinforced Steel Bars, Sheets, Angles, Channels, Beams, UB UC, Hollow Tubes, Chequered Plate, Round Bars, Shafting Bars, Pipes, etc.

Pipes and Hollow Section

- ⦿ Mild Steel/Galvanized Pipes
- ⦿ M.S. Pipes (Sch 40)
- ⦿ Square/Rectangular Hollow Sections

Flat Products

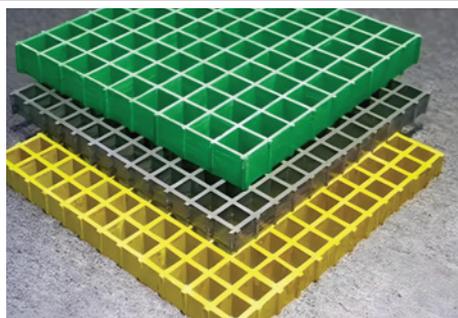

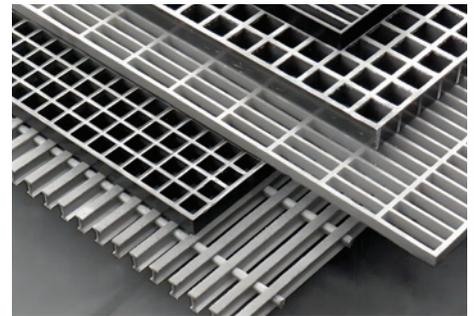

- ⦿ Hot Rolled Coils / Sheets/Plates
- ⦿ Mild Steel Chequered Sheets
- ⦿ Cold Rolled Coils / Sheets
- ⦿ Galvanized Steel Coils / Sheets
- ⦿ Aluminium Plain Sheets / Chequered Sheets

Gratings

ERA Gratings is one of the largest electroformed grating fabricators in the world and has capacity to produce over 250 MT of grating panels per day using its seven ultra modern lines and maintain a stock of grating panels ready to be dispatched on short notice.

Customized Gratings

- ⦿ Rectangular Gratings
- ⦿ Circular Gratings

FRP Gratings

- ⦿ Moulded Gratings
- ⦿ Pultruded Gratings

Fabrication

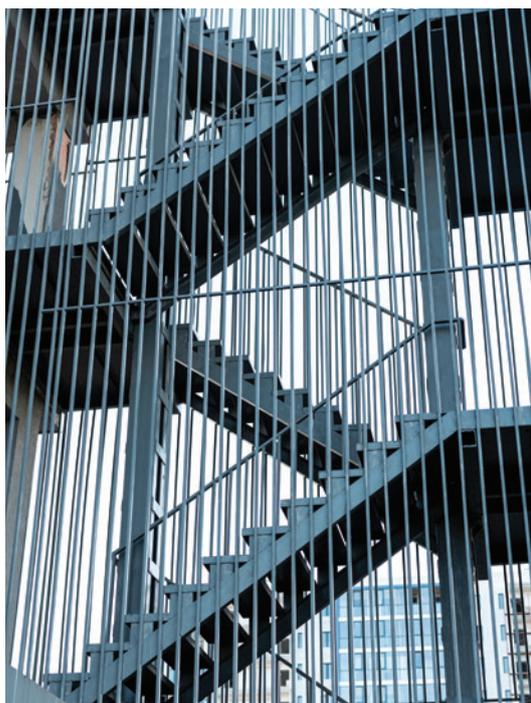

Our Products

Electroformed grating panels are produced by forging bearing bars and cross bars using heavy current and pressure resulting in greater strength than mechanical assembly. ERA produces electroformed grating panels and fabricates cut-to-size / customized electroformed gratings, heavy duty gully gratings and stair treads as per client's specifications. These gratings can be supplied in self- colour, hot dip galvanized, painted electropolished surface finish.

We supply a wide range of steel gratings ranging from 25mm to 150mm height. These gratings are with either plain or serrated bearing bars.

Aluminum Fabrication

- ◉ Stair Case Hand Rails
- ◉ Doors
- ◉ Windows
- ◉ Quality Control and Standards
- ◉ Pollution Control
- ◉ Energy Conservation

Steel Fabrication

- ◉ Shelters
- ◉ Pipe Racks
- ◉ Pipe Supports
- ◉ Stairways
- ◉ Platforms
- ◉ Ladders
- ◉ Gratings
- ◉ Crane Girders
- ◉ Silos, Cyclones, Hoppers & Bins
- ◉ Pipe Spools
- ◉ Stacks
- ◉ Grit Blasting and Painting

Professional Workforce Support

The ERA team of HR are capable to provide all kinds of Professionals services to Engineering, Construction, HSE, IT, Inspection, Administration and other Technical sectors. Our Clients are always receiving the best workforce staffing services at all time. We have flexible partnership with reputed firms, which will allow us to provide suitable candidates matching with client expectation.

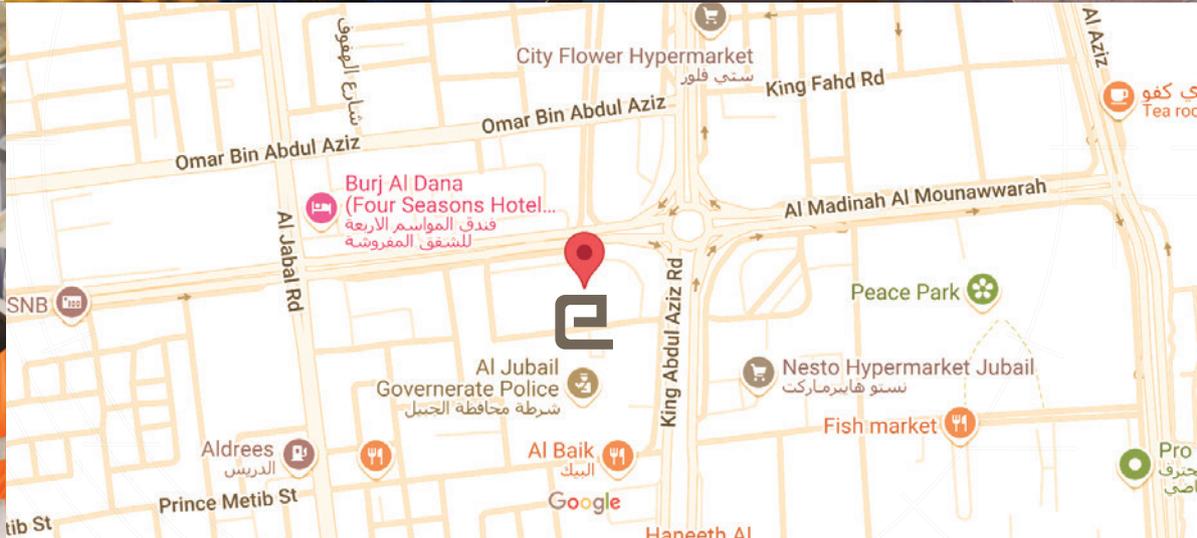

Plant Maintenance Support Services

Support local and international talent for in plant Operations and Maintenance Services in different industry sectors, complying with our clients requirements

Turnaround & Shutdown Support Services

Provide qualified resources for Plant Turnaround and Shutdown activities to deliver within limited time schedule.
